

## DATA ACCESS

Core data from both experiments (plant species cover data and plant biomass data) are available to interested users for the years 2001-2008. Data for 2009 will be available spring 2010.

Requests for these data, and associated metadata, should be sent via e-mail to the project lead PI (Bryan L. Foster, Ecology and Evolutionary Biology, University of Kansas; [bfoster@ku.edu](mailto:bfoster@ku.edu)).

Requests must include a detailed description of how the data will be used. Written permission must be granted by the PI prior to any publication of the data.
