IPSR offers many other services to assist you with your research.

Computing Services can assist with the selection of hardware and software for your project. Computing Services can also provide consultation for **data collection, data management, analysis, and visualization**. Additionally, IPSR can provide web space, design, and management for a **project website**.

Disseminating the results of your research is an important component of the project. IPSR has many outlets for advancing the **dissemination of your results**. The IPSR website offers two outlets for your research: posting of the report on its own **website** or inclusion in the IPSR library of **numbered reports**. We can also produce **hardcopies** of your reports. IPSR can post your research to the KU **Scholarworks** community. For presentations of your work, IPSR has monthly lunches for presentation to the IPSR community. We can also assist in the coordination of campus- and community-wide events such as **seminars, symposia, lectures, and special events**.

IPSR staff hold a wide range of skills to assist you with your research. In addition to technical staff, IPSR has in-house economists and a network of faculty from departments across campus. Our administrative staff can help you with the nuts and bolts of completing your project on-budget.
