Subject: Continued Accreditation Granted for 10 Years

Dear Ms. Nyght:

The directors of the Council on Accreditation of Nurse Anesthesia Educational Programs (COA) are pleased to inform the University of Kansas Medical Center Program of Nurse Anesthesia Education, Kansas City, KS, that continued accreditation has been granted. This decision recognizes the program for providing a graduate level curriculum leading to the award of a Master of Science, Nurse Anesthesia degree. A certificate designating this accreditation that is effective May 19, 2010 is enclosed.

Given this action of the COA, the program will be scheduled for its next consideration of continued accreditation in **Spring 2020**. The COA may change this to an earlier time as a result of new or additional information, changes in the activities of your program, or changes needed in the accreditation review schedule. Your program will be notified of any change in advance of the time of the next review.

The 1996 Accreditation Policies and Procedures (page D3) manual states: "Established programs must submit anonymous faculty and student evaluations at the mid-point of an accreditation cycle. For example, a program receiving a 10 year accreditation would submit evaluations at 5 years following the accreditation decision." The COA uses an online evaluation process. Accordingly, we will send you instructions for the student and faculty online evaluations in **Fall 2014**. Students and faculty must submit the completed evaluations by **December 1, 2014**. All evaluations will then be reviewed by the COA at its **Spring 2015** meeting.

Finally, the COA would like the program to know that very few programs are granted accreditation with no progress report required. Even fewer programs have achieved the maximum accreditation of ten years. Therefore, the directors of the COA are particularly pleased to offer their congratulations to everyone at the program who has demonstrated their commitment to meeting the requirements for continued accreditation.

Please accept the COA's congratulations on the program's performance in achieving maximum accreditation status.

Sincerely,

Francis Gerbasi, CRNA, PhD  
Executive Director
