**Notes:** "Cont. Accred." is used when a program has been accredited and maintains a status of continuing accreditation as the result of a site visit or from action stemming from review of annual reports. "Accredited" is used when a program experienced a change in accreditation status (such as coming off probationary status). "Init. Accred." is used when a program has received its initial accreditation.

1. The Medical Laboratory Scientist program equates to the Clinical concentration of the Clinical Laboratory Sciences major; the Diagnostic Molecular Scientist program equates to the Molecular Biotechnology concentration of the major.
2. The Cytotechnology program is currently inactive and not enrolling students. The program is in good standing with CAAHEP and in compliance with all standards.
3. Accrediting agency moved site visit from 2011 to 2015.
4. The Certified Registered Nurse Anesthetist (CRNA) Program moved to the DNP level in July 2012 and was granted accredited status under the original umbrella covering the MS program.
5. The Kansas Board of Nursing schedules its site visit at the same time as the accrediting body, The Commission on Collegiate Nursing Education. Programs are approved for the same length of time as the CCNE accreditation.
6. No accreditation is currently available for the program.
7. This program falls under the Next Accreditation System (NAS) of the ACGME. The ACGME are now using a continuous accreditation model with collection and review of annual data from each program. All programs, with the exception of applications and very newly-accredited programs, will have a scheduled self-study visit every 10 years. In addition, programs may have focused or diagnostic site visits, if the annual data submission suggests a potential problem.
8. Combined program approved by the American Boards of Internal Medicine and of Psychiatry and Neurology. Each specialty is separately accredited by ACGME.
