

Gerontology course list for FALL 2008

To students and faculty advisers interested in Gerontology –

The Timetable of Classes for Fall 2008 can be searched (“Advanced Search”)for courses that are cross-listed to Gerontology. Gerontology teaches no courses of its own under our abbreviation GERN, but the Timetable does list courses related to aging.

Search the Timetable at <http://www.opensections.ku.edu/index4089.html>

Several boxes down on the search page, there is a menu for “Specific Areas of Interest Designator” that begins ANYXREF. Scroll down to the line, “Cross-referenced with GERN.” Then “Submit Request” to see the list of courses. I have pasted the list in below, but it may not be visible on your viewer.

Please note, however, that the items below are the Registrar’s cross-listing, which we reviewed the best we could. Take care that the content of the course is what you want because some departments put changing content under generic course numbers that sometimes have age-related content. Consider this list the starting point of your course selection process.

We would also appreciate hearing about any courses that are not listed here, but should be.

Thank you.
David Ekerdt

Office of the University Registrar

The University of Kansas - TimeTable Class Search for Fall 2008
