This training is presented through the Kansas Local Technical Assistance Program (LTAP) and the KU Transportation Center. Funding provided by the Kansas Department of Transportation, the Federal Highway Administration and the University of Kansas.

About the Workshop. Many KS LTAP workshops provide instruction in safe practice, and many agencies also provide this information to their staff. We know that a common attitude of highway and road crew members is one of “can do will do” – these individuals occasionally accomplish tasks beyond what “safe practice” might warrant.

This workshop will provide more comprehensive instruction in workplace, job site and equipment safety on topics specific to Kansas road, bridge and highway staff. A group of Kansas county, city and state safety professionals identified the topics which will be addressed and general safety concerns to be covered in the workshop.
