

***KU Endowment created this
Tangram (Chinese puzzle) just
for you Jayhawk fans!***

A tangram consists of seven pieces, called tans, which fit together to form a specific shape — in this case, a Kansas Jayhawk. To complete the puzzle successfully, all seven pieces must be used, and they may not overlap.

Instructions: Carefully cut out the blue tangram pieces below. Using all seven pieces, arrange the shapes to create the image of the Jayhawk shown at right. Remember, none of the pieces may overlap.
